This ground light can be mounted into wooden decking or into concrete, if mounting in concrete we would recommend using the concrete installation tube listed in the options below at a cost of £15.00 each +vat.

Concrete installation tube

This decking light is designed to be used exclusively with the PLU/350 power supply unit (cost £23.90 each +vat), each power supply unit will run up to 9 lights. The PLU/350 power supply as it is should be mounted indoors or can be fitted outside using the waterproof enclosure.

PLU/350 Power supply

PLU/350 waterproof enclosure

Another Option which makes wiring simple is the UY2 quick connector, this connector is waterproof and just makes the job of extending and connecting cables much easier. You simply expose the cable ends to be joined insert into the UY2 and snap down, the connector works best with 0.35mm cable.

Dimensions of UY2 10MM X 15.5MM.
